

Eren Yeager

Backend Software Developer

eren.yeager@candidate.demo | Tel Aviv, Israel | github.com/shigoto-demo-eren

PROFILE

Computer Science student focused on backend development, distributed systems, and reliable APIs. Hands-on experience with Java, Spring Boot, SQL, and service-oriented application design.

TECHNICAL SKILLS

Java, Spring Boot, REST APIs, PostgreSQL, JPA/Hibernate, Maven, Git, Docker basics, Python

EXPERIENCE

Backend Development Project

2025 - 2026

Built REST services in Java and Spring Boot, designed relational data models, implemented validation and exception handling, and wrote automated tests.

Student Software Project

2024 - 2025

Developed a small task-tracking service with authentication, role-based access, and PostgreSQL persistence.

EDUCATION

B.Sc. Computer Science, Open University of Israel - In progress

PROJECTS

Service Health Dashboard - Implemented a backend API for service status monitoring, health checks, and incident summaries.

Concurrent Job Tracker - Created a thread-safe job tracking prototype and documented concurrency tradeoffs.

Fictional sample CV created solely for the Shigoto demonstration environment.
