

Mikasa Ackerman

Full Stack / C++ Developer

mikasa.ackerman@candidate.demo | Haifa, Israel | github.com/shigoto-demo-mikasa

PROFILE

Software developer with experience across frontend delivery and systems programming. Interested in high-performance applications, clean UI implementation, and dependable backend integration.

TECHNICAL SKILLS

C++, JavaScript, React, HTML/CSS, Java, REST APIs, SQL, Git, Linux, Data Structures

EXPERIENCE

Full Stack Student Developer

2025 - 2026

Implemented responsive React interfaces, integrated REST APIs, and collaborated on backend validation and database workflows.

Systems Programming Project

2025

Built and benchmarked C++ components with attention to memory safety, synchronization, and performance.

EDUCATION

B.Sc. Computer Science, Technion - Israel Institute of Technology - In progress

PROJECTS

Thread-Safe In-Memory Cache - Implemented a C++ cache supporting concurrent readers and writers with synchronization mechanisms.

Recruitment Dashboard UI - Built reusable React components for filtering, status visualization, and form validation.

Fictional sample CV created solely for the Shigoto demonstration environment.
